**DETAILED ACTION**

***Allowable Subject Matter***

**Claims 1-5 and 8-12** are allowed.

The following is an examiner's statement of reasons for allowance: the cited prior art, alone or in combination, do not teach or fairly suggest the invention as claimed in **claim 1**, a recording device control apparatus that successively receives transfer requests and controls transfer of data comprising: a management information judgment unit operable to judge whether or not a focus request is a transfer request for management information, and on judging that the focus request is a transfer request for management information, judge whether or not a transfer request for management information exists before the focus request; and a request judgment unit operable to: judge whether or not a transfer request having type information identical to the type information of the focus request exists before the focus request; specify data relating to the focus request as a transfer target when the management information judgment unit judges that a transfer request does not exist before the focus request; and set a transfer request closest to the focus transfer request, as the focus request, if a transfer request exists before the focus request.

As to **claim 11**, the cited prior art, alone or in combination, do not teach or fairly suggest a recording device control method for successively receiving and controlling transfer of data, the method comprising the steps of: judging whether or not a focus request is a transfer request for management information, and if the focus request is a transfer request, determine whether or not a transfer request having type information identical to the type information of the focus request exists before the focus request; specifying data relating to the focus request as a transfer target; and setting the transfer request closest to the focus transfer request as the focus request.

As to **claim 12**, the cited prior art, alone or in combination, do not teach or fairly suggest a computer program recorded in a computer-readable recording medium for successively receiving and controlling transfer of data, the computer program comprising instructions to implement the steps of: judging whether or not a focus request is a transfer request for management information, and if the focus request is a transfer request, determine whether or not a transfer request having type information identical to the type information of the focus request exists before the focus request; specifying data relating to the focus request as a transfer target; and setting

the transfer request closest to the focus transfer request as the focus request.

Further, the combination of the limitations set forth above with all of the limitations in claims 1, 11 and 12 are not obvious. In addition, Applicant's arguments filed on 10/02/2009 are persuasive.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
